PROFESSIONAL SUMMARY

B.Tech CSE (AI & Data Science) student with hands-on experience in Python-based software development, REST API integration, automation, SQL databases, and AI-powered applications. Built automation workflows, an AI SEO platform, and customer-support chatbot solutions using Python, Node.js, FastAPI, n8n, and AI APIs. Strong foundation in DSA, DBMS, MySQL/PostgreSQL, Docker, and Git/GitHub, with a focus on practical and maintainable solutions.

EDUCATION

Vivekananda Global University, Jaipur — B.Tech CSE (AI & Data Science) | 2023–2027 | CGPA: 8.0

Jawahar Navodaya Vidyalaya, Kalukheda — Class 12: 73.2% | Class 10: 92% | 2018–2023

TECHNICAL SKILLS

Languages: Python, SQL, C

Web / Backend: FastAPI, REST APIs, Node.js, HTML, CSS

Databases: MySQL, PostgreSQL, DBMS

Development & Tools: Git, GitHub, Docker, n8n

AI / Data Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, TensorFlow

Core Concepts: DSA, OOP, API Integration, Automation, CI/CD

EXPERIENCE

MetaBlock Technology — Data Analyst Intern | 2026–Present

- Developed AI-powered lead-generation workflows that identified 2,500+ qualified leads.
- Built an AI-powered SEO automation platform for generating technical SEO audits.
- Designed an LLM-powered chatbot to automate customer-support queries.
- Integrated n8n workflows with AI APIs to automate SEO analysis and reduce manual effort.

TeachNook — Data Science & Analytics Training | 2024

- Developed machine learning models for Health Insurance Cross-Sell Prediction and Vehicle Insurance Prediction.
- Built interactive Power BI dashboards to communicate business insights and model outcomes.

Accorent Pvt. Ltd. — Jr. Data Analyst Intern | 2023–2024

- Supported data preparation, research activities, reporting, and documentation.
- Assisted analysis workflows using Python and Power BI.

PROJECTS

AI SEO Automation Platform: Built an automation workflow using n8n and AI APIs to perform technical/on-page SEO analysis and generate audit outputs.

Stock Management System — Python: Developed a Python-based application for managing stock-related operations and data.

AI Customer Support Chatbot: Designed an LLM-powered chatbot workflow to automate customer-support queries.

Graph-Based Network Analysis Model: Developed a machine-learning project focused on graph-based network analysis.

Health Insurance Prediction Dashboard — Power BI: Built an interactive dashboard to present prediction results and business insights.

CERTIFICATIONS

- Python for Data Science — IBM
- EXIN BCS AI Essentials — EXIN
- Google Data Analytics — Data, Data, Everywhere
- Illinois Data Visualization
- Power BI for Beginners — Great Learning
- EXIN BCS Blockchain Essentials — EXIN
