

KESHAV SAIN

WEB PROGRAMMER | SEARCH ENGINE OPTIMIZER

Keshavsain.jpr@gmail.com | Jaipur, Rajasthan | 9887159297 | LinkedIn: linkedin.com/in/keshav-sain-4450271b2 | GitHub: github.com/Keshavsain1

PROFESSIONAL SUMMARY

B.Tech CSE (AI & Data Science) student with hands-on experience in Python, Node.js, FastAPI, REST APIs, SQL databases, web technologies, automation, and technical SEO. Built an AI-powered SEO automation platform, automated SEO analysis with n8n and AI APIs, and developed an LLM-powered chatbot. Strong foundation in DSA, DBMS, Git/GitHub, Docker, and API integration, with practical experience building automation and software solutions.

EDUCATION

Vivekananda Global University, Jaipur — B.Tech CSE (AI & Data Science) | 2023–2027 | CGPA: 8.0
Jawahar Navodaya Vidyalaya, Kalukheda — Class 12: 73.2% | Class 10: 92% | 2018–2023

TECHNICAL SKILLS

Programming: Python, SQL, C

Web / Backend: Node.js, FastAPI, REST APIs, HTML, CSS

SEO & Automation: Technical SEO, On-Page SEO, SEO Audits, n8n, AI API Integration

Databases: MySQL, PostgreSQL, DBMS

Development Tools: Git, GitHub, Docker

Core Concepts: DSA, OOP, API Integration, Automation, CI/CD

EXPERIENCE

MetaBlock Technology — Data Analyst Intern | 2026–Present

- Built an AI-powered SEO automation platform capable of generating technical SEO audits.
- Automated SEO analysis using n8n and AI APIs, reducing manual effort.
- Developed AI-powered lead-generation workflows that identified 2,500+ qualified leads.
- Designed an LLM-powered chatbot to automate customer-support queries.

TeachNook — Data Science & Analytics Training | 2024

- Developed machine-learning models for Health Insurance Cross-Sell Prediction and Vehicle Insurance Prediction.
- Built interactive Power BI dashboards to visualize business insights and model outcomes.

Accorent Pvt. Ltd. — Jr. Data Analyst Intern | 2023–2024

- Contributed to data preparation, research tasks, report documentation, and analysis workflows.
- Used Python and Power BI for analysis and experimentation.

RELEVANT PROJECTS

AI SEO Automation Platform: Built an automation platform using n8n and AI APIs to perform technical/on-page SEO analysis and generate technical SEO audit outputs.

Stock Management System — Python: Developed a Python-based stock management application for handling inventory-related operations and data.

AI Customer Support Chatbot: Designed an LLM-powered chatbot workflow to automate customer-support queries.

Health Insurance Prediction Dashboard — Power BI: Built an interactive dashboard to present prediction results and business insights.

Graph-Based Network Analysis Model: Developed a machine-learning model for graph-based network analysis.
